SUMMARY

Results-oriented and innovative **Computer Science Engineer** with a passion for leveraging technology to solve complex problems. With a robust foundation in CSE and a penchant for staying updated, I'm poised to contribute effectively to groundbreaking projects in AI and web development.

EDUCATION

Jyothy Institute of Technology - VTU
Bachelor Of Engineering (CSE) - CGPA - 8.8

Dec '21 – June '25
Bengaluru, India

TECHNICAL SKILLS

Programming Languages: JavaScript, C++, Python.

Libraries/Frameworks: ReactJS, NodeJS, ExpressJS, RASA.

Databases: MySQL, PostgreSQL, MongoDB.

Design Tools: Blender, Adobe Lightroom, Canva.

Developer Tools: VS Code, Visual Studio Code, Git, Unreal Engine 5, Unity, Android Studio, Eclipse Ditto, Docker(familiar), Postman, Redis-Cluster.

INTERNSHIP EXPERIENCE

Software Engineer Intern - 6D Technologies

Sept '24 – Jan '25

On-Site

- Worked on oneM2M architecture, focusing on MN-CSE and RemoteCSE communication.
- Developed and optimized discovery APIs for efficient resource management.
- Enhanced the scalability and compliance of oneM2M systems using Node.js, ExpressJS and MySQL.

Software Engineer Intern - TechCrafter.CPS

Mar '25 – Present

Remote

- Developed a web-based digital twin to visualize and track real-time health data.
- Implemented patient-specific vitals monitoring with dynamic health simulations.
- Built RESTful APIs in Node.js for data ingestion and anomaly detection.
- Designed an interactive ReactJS dashboard with PostgreSQL for persistent storage.

PROJECTS

Next-Gen Crowd Surveillance System using YOLOv8

2025

- Built a real-time multi-camera person tracking system using YOLOv8.
- Implemented centroid tracking for accurate entry/exit counting.
- Developed a WebSocket-based dashboard for live video and analytics.
- Enabled dynamic camera configuration and scalable performance.

Smart India hackathon

2023

- Led Smart India Hackathon 2023 project for multi-language railway announcements.
- Where our team secured 3rd place out of 25 teams
- Deployed NLU, NLP, and language identification algorithms.
- Implemented TTS synthesis for natural-sounding speech output.

Smart Resource Management System

2025

- Implemented MN-CSE and RemoteCSE communication in the oneM2M architecture.
- Developed discovery mechanisms for efficient IoT resource management.
- Optimized request handling and resource registration in oneM2M-compliant systems.

RASA Chatbot

2024

- Developed a chatbot for 5th-semester CSE students to assist with AIML topics.
- Implemented OCR to extract text from uploaded images of study materials.
- Utilized NLP and LLM to provide relevant answers from the extracted text data.
- Designed the chatbot for continuous improvement through user feedback and data updates.

CERTIFICATION

-
- | | |
|---|-----------------|
| • Python Programming Workshop by Tequed Lab | <i>Jul 2024</i> |
| • RHCSA Skill Internship by college | <i>Oct 2022</i> |
| • Cybersecurity Skill Internship by college | <i>May 2023</i> |
| • Introduction to cybersecurity and attacks (IBM) | <i>May 2024</i> |
| • Unreal Game Development for Beginners | <i>Oct 2024</i> |
| • RHCSA-EX200 | |

Date: December 2023
